

Changing HTML Donation Buttons for ecoREHAB

There are a few things to recognize about your site. Wordpress is popularly for blogging, and small business website design. There are a few main differences between different wordpress installations, this is primarily based on who hosts the server for the website. **Wordpress.com** is hosted by wordpress.com, this poses a few limitations that are implemented by wordpress.com. Such as in ability to use the following: javascript, iframes, and any sort of html external embedding (they do offer some embedding through their feature set, but it is not universal). **Wordpress.org** is an open-source blogging/small-company website software . Wordpress is hosted on servers that an administrator chooses to install on. This document will explain how to do the following:

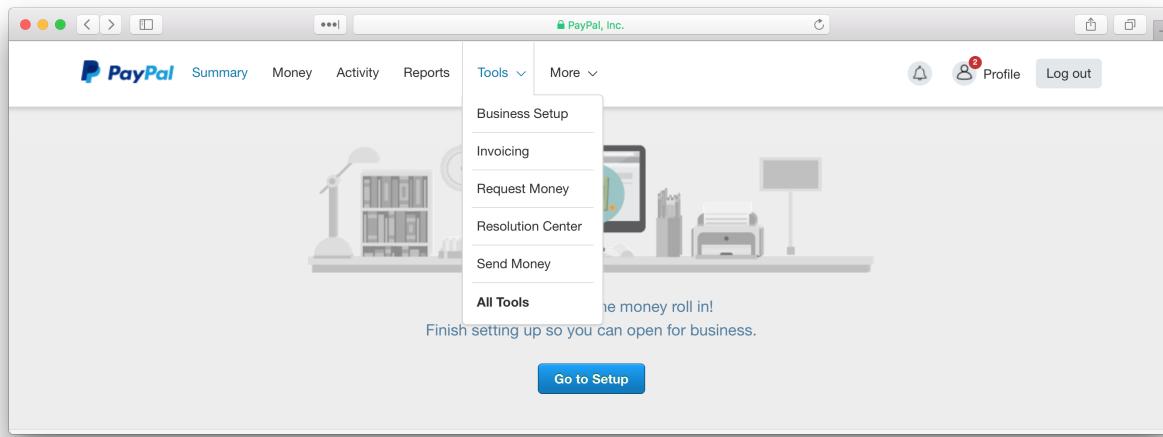

- Change a donation button's values on PayPal.
- All Aspects of a donate button's code.
- How to change the image of a donate button.
- Where and how we obtained the current buttons on the donation page.

Change a donation button's values on PayPal.

This is Paypal's home page. In order to change a button, click on the **Tools** bar at the top.

Once the Tools bar is clicked, click **All Tools**

Scroll down until you see the PayPal buttons button, click Open

A screenshot of the PayPal Tools page. The top navigation bar includes Summary, Money, Activity, Reports, Tools (selected), and More. Below the navigation, there's a grid of eight cards, each representing a different PayPal service. The cards are arranged in two rows of four. The first card is "Payments Pro" (Open). The second card is "PayPal buttons" (Open). The third card is "Mass Payments" (Open). The fourth card is "Express Checkout" (Open). The fifth card is "PayPal debit card" (Learn more). The sixth card is "Promote financing" (Open). The seventh card is "Cross-border trade" (Open). The eighth card is "Multi-order shipping" (Open). Each card has a small icon and a brief description.

Move to the Action drop down, click it and then click Edit button

My Saved Buttons

We automatically save buttons you create when you're logged in. Here, you can change most button characteristics, view the HTML code, or create new buttons that are similar to existing ones. However, you may not be able to change fields if you've created them using an API.

Click [Action](#) or [Related Items](#) link to get started.

| Item name | Qty. available | Price | Action |
|---|----------------|--------|---------------------------------------|
| ▼ Donate (ID: CR4GJXBA8HW88) Created 4/14/2017 | N/A | \$0.01 | Action ▾ |
| ▶ Donate | | | Edit button |
| ▶ Sample Add to Cart Button | | | View code |
| ▶ Sample Subscription Button | | | Create similar button |

Any edits to this button will be available here. Names of button, amounts of button, etc.

Step 1: Choose a button type and enter your payment details

Choose a button type
[Buy Now](#) ▾

Which button should I choose?
[Go to My saved buttons](#) to create a new button similar to an existing one.

Item name Item ID (optional) [What's this?](#)

Price Currency [USD](#) [Need multiple prices?](#)

Customize button

- Add drop-down menu with price/option [Example](#)
- Add drop-down menu [Example](#)
- Add text field [Example](#)
- ▶ [Customize text or appearance \(optional\)](#)

Your customer's view

[Buy Now](#)

Shipping

Use specific amount: USD [Help](#)

Tax

Use tax rate %

Merchant account IDs [Learn more](#)

Use my secure merchant account ID
 Use my primary email address cbusenbu@gmail.com.

[Step 2: Track inventory, profit & loss \(optional\)](#)
[Step 3: Customize advanced features \(optional\)](#)

[Save Changes](#)

The following we would not recommend changing, except that the buttons don't work. If a link when a transaction is cancelled does not work, it is important that the **Take customers to this URL when they cancel their checkout** has the correct site page to revert to. The same is true for **Take customers to this URL when they finish checkout**

When finished press the **Save Changes** button at the bottom

If you are an advanced user, you can customize checkout pages for your customers, streamline checkout, and more in this section.

Do you want to let your customer change order quantities?

Yes
 No

Can your customer add special instructions in a message to you?

Yes
Name of message box (40-character limit)

No

Do you need your customer's shipping address?

Yes
 No

Take customers to this URL when they cancel their checkout

Example: https://www.mystore.com/cancel

Take customers to this URL when they finish checkout

Example: https://www.mystore.com/success

Advanced variables [What's this?](#)

Use a line break between each variable. The variables will appear in your button's HTML code. [Learn more](#)

Add advanced variables

Example
address_override=1
notify_url=https://www.mywebsite.com/PayPal_IPN

Make sure to click the **Email** tab.

Add your button code to your webpage

You just created customized HTML code for your button. The final step is to copy the code from this page and paste it into your website editor.

Copy the button code:

- Click Select Code
- Right-click and copy the selected code.

If you're working with a website developer, you can paste the button code into an email and send it to your developer now.

Paste the button code in your website editor:

The code must be pasted in the "code" view, where you can view and edit HTML.

- In your website editor or admin page, open the page where you want to add your button.
- Look for an option to view or edit HTML.
- Find the section of the page where you want your button to appear.
- Right-click and paste your button code into the HTML.
- Save and publish the page. (The preview function in your editor may not display the button code correctly.)
- Test the button to make sure it links to a PayPal payment page.

Website Email

https://www.paypal.com/cgi-bin/webscr?cmd=_s-xclick&hosted_button_id=CR4GJXBA8HW88

[Select Code](#) [Go back to edit this button](#)

Create more buttons

[Create similar button](#) | [Create a new button](#)

Similar: Use the button you just created as a template for another button.
New: Create a completely new button from a blank form.

[Go to My saved buttons](#)

This will give you the following link, that will be used for the `href` tags in the following code.

```
https://www.paypal.com/cgi-bin/webscr?cmd=_s-xclick&hosted_button_id=CR4GJXBA8HW88
```

Donation Button Code

This is an example of one button on the current development website.

```
</a><a style="margin-right:1em;" href="https://www.paypal.com/cgi-
bin/webscr?cmd=_s-xclick&hosted_button_id=3HDGMPD4YPT56" target="_blank"
rel="nofollow noopener noreferrer">
```

The two tags that concern us most are the `` and `href` tags. In the example above they are the following:

If an image needs to be changed, the location of the image on the server should be put in between the quotations in the text below.

```

```

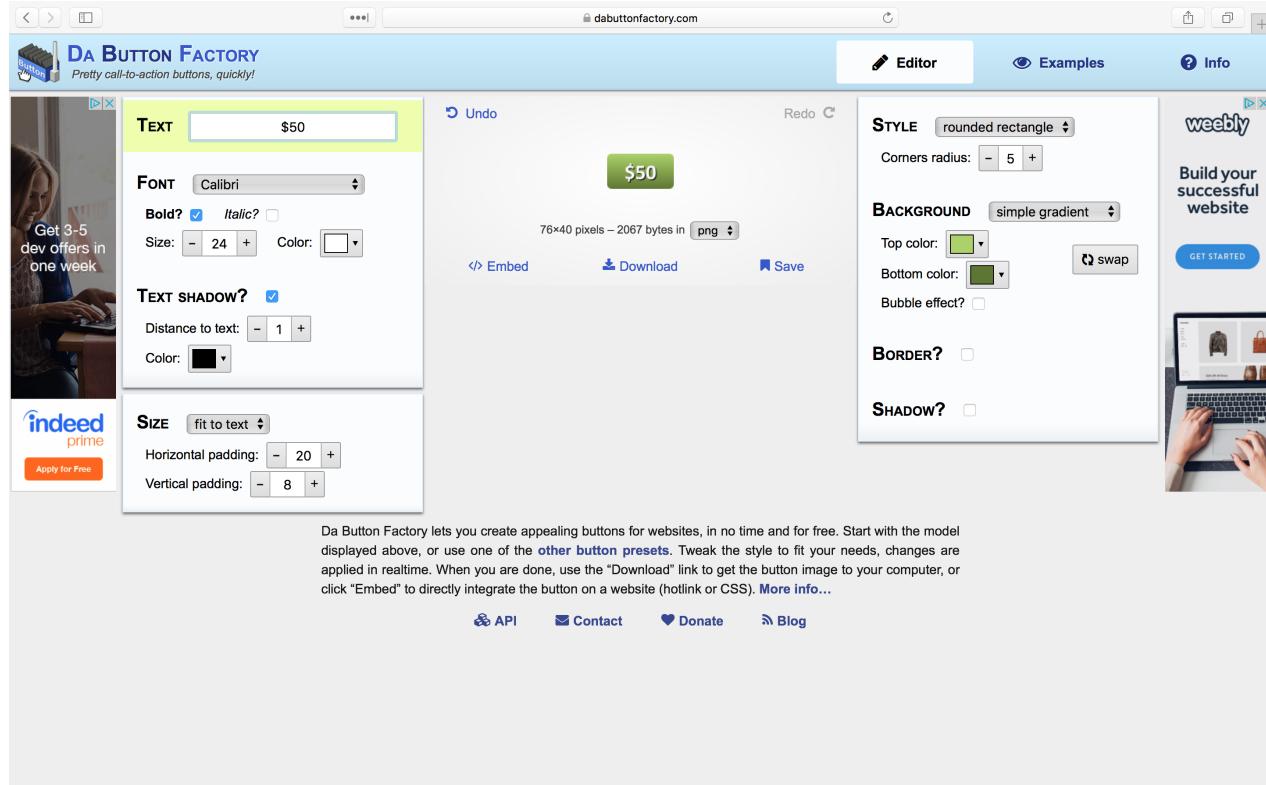

If the button link from paypal needs to be changed it should be changed in between the quotations after `href =` in the code below.

```
<a style="margin-right:1em;" href="https://www.paypal.com/cgi-bin/webscr?
cmd=_s-xclick&hosted_button_id=3HDGMPD4YPT56" target="_blank" rel="nofollow
noopener noreferrer">
```

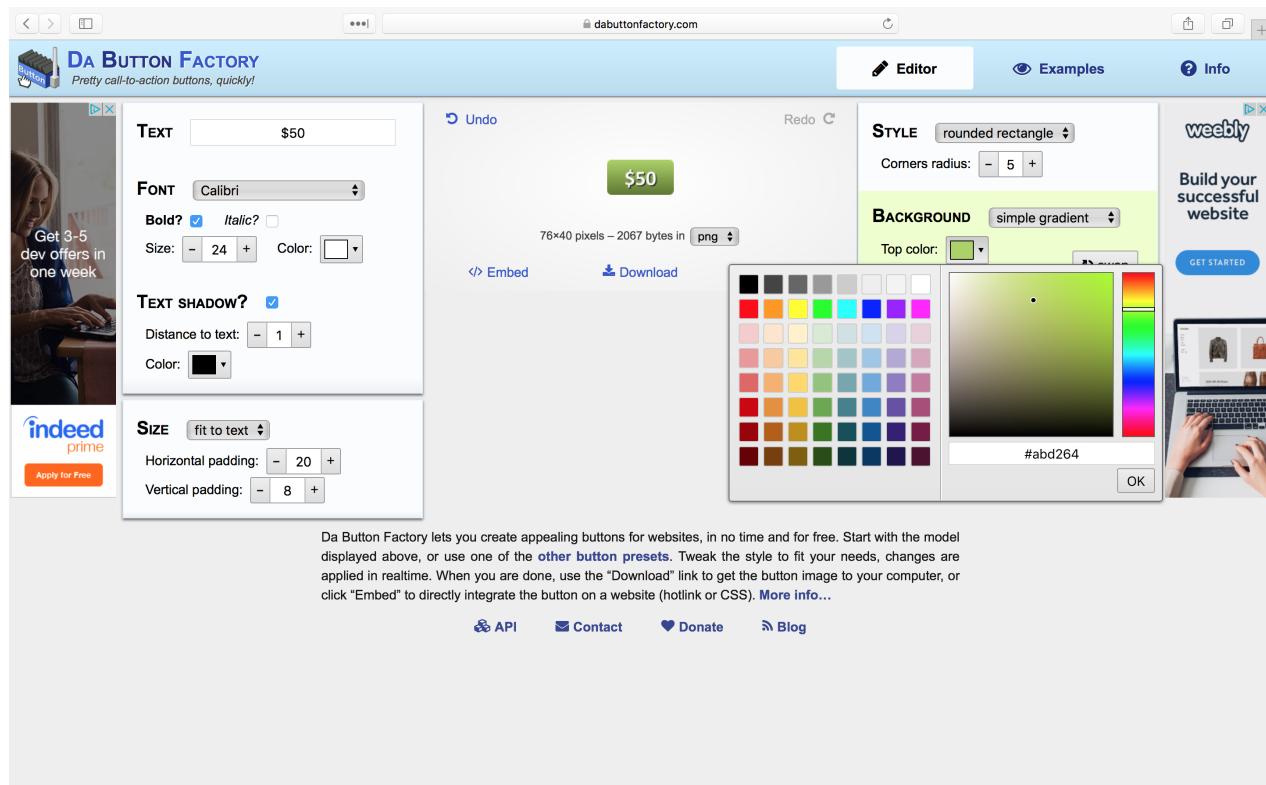

The only of these that are necessary for changing in the future might be the image of the button. If the paypal button is edited, the link or `href` piece will stay active, so this should only be changed with the addition of a new button.

Where and how we created current buttons.

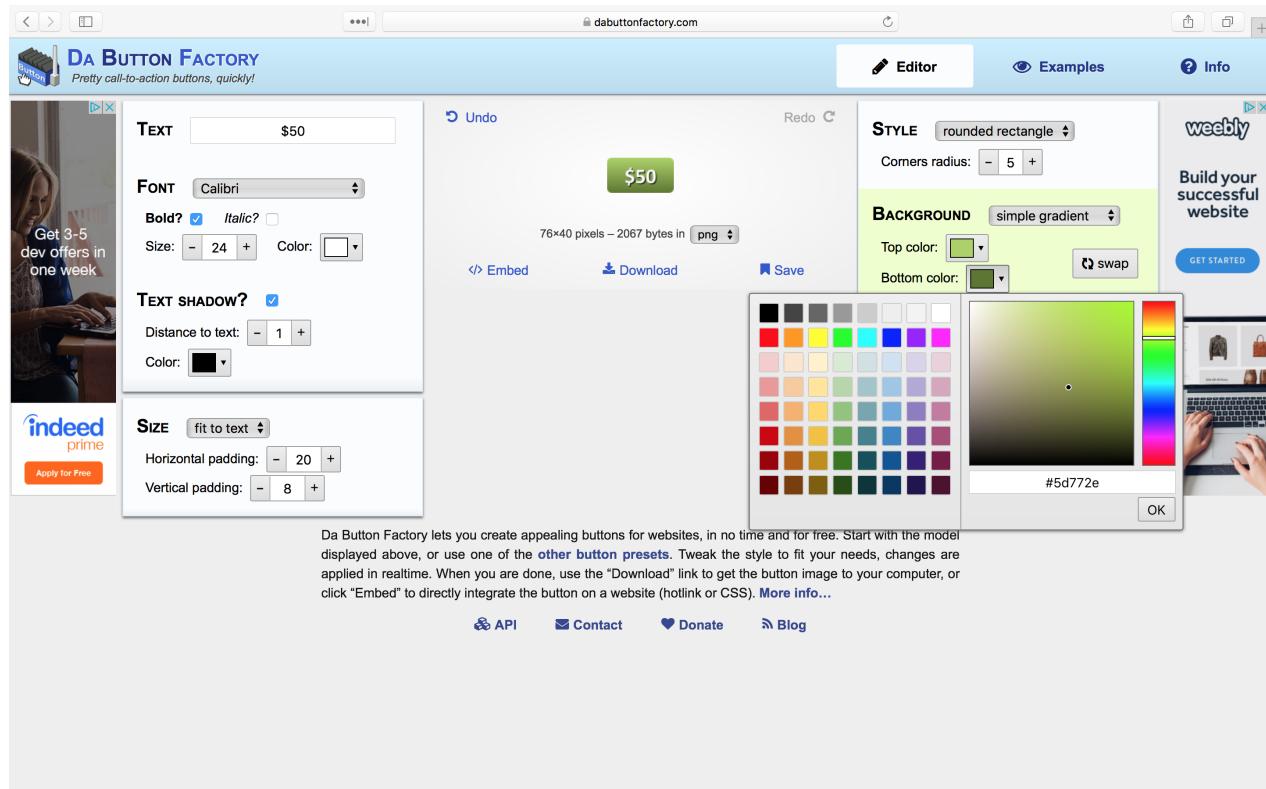

We obtained the current button images from a button generator at dabuttonfactory.com.

We ended up using #abd264 for the top portion of the button, which is the ecoREHAB green in hexadecimal color notation.

We then adapted the color to be a little darker, which turned out to be #5d772e

If you are unsure of how to link the button by hosting it on your website, it is also possible to get the href link from this website, and have the button from dabbuttonfactory. Click the </>Embed tab, then copy and paste the URL of the current button image. To replace the image in your button above.
